

Heavy duty "brush shaped polishing discs" for best performance

#### **PLATINUM**

Pre-polishing of Platinum without any additional polishing compound

## **GOLD**

Easy to create a satin finish on gold with the new HABRAS Disc Pro

# **SILVER**

Welded joints are easly cleaned with the brush shaped discs

**HABRAS Disc Pro** are brush shaped mounted polishing discs. They consist of soft polyamide in which abrasives are embedded. The unique brush design of these discs and their colour indicated abrasiveness enhance their effectiveness. From fine grinding, through pre-polishing up to fine polishing, these **HABRAS Disc Pro** have many applications. **HABRAS Disc Pro** are used at 5,000 rpm without any additional polishing compound.

5,000 rpm

Heavy duty "brush shaped polishing discs" for best performance

### **Tool Steel**

Paint removal on tool steel at a good pace

## **Stainless Steel**

Clean polishing of dirty stainless steel

#### **Brass**

Deburring of drillings and slots on brass profiles

○ 5,000 rpm
